AYRTON | Beautiful timber
windows & doors

About Ayrton

Founded in 1987, we are a privately owned British company that specialises in replacing timber doors and windows. Our business is based upon exceptional craftsmanship and beautiful design, working with our clients to create the perfect replacement for their old timber door.

We have an unrivalled reputation for bespoke design, high-quality manufacture, sympathetic installation and first-rate aftercare. All our design and customer service resides here in the UK, whilst our doors and windows are handcrafted in Lithuania. The quality remains outstanding, but it means our build costs are lower.

This allows us to invest in the very best talent and materials, and – crucially – offer excellent value to you, our clients.

The Ayrton Journey

First, a home visit

We know that choosing your new front door isn't an open-and-shut process (excuse the pun), so we will be with you every step of the way. Our work starts with a visit to your home to measure the door and discuss your specific requirements. We come equipped with expert knowledge to kickstart the project, and can put together a detailed, bespoke quote for you. Whether you already have a particular style in mind, are looking to replicate an existing door, or are even in need of creative inspiration, we are here to guide you.

Grand designs

Once you've placed your order our designers will conduct a survey, take precise measurements, discuss design details (such as paint colour and door furniture options) and work out any challenges that may arise with your installation – maybe a fuse box is in the way? Your designer will be in touch with computer-aided design (CAD) drawings for your approval before the door is created.

“ I can’t recommend Ayrton enough. We chose them for their wide range of front doors, and their flexibility in adapting designs. We wanted to keep with the style and aesthetics of the original door. From the beginning stages of design right through to installation, they were fantastic. They were polite and professional. Even the designer came to personally oversee final bits. We couldn’t be happier – also we’re getting a lot of compliments! ”

LM, Crouch End

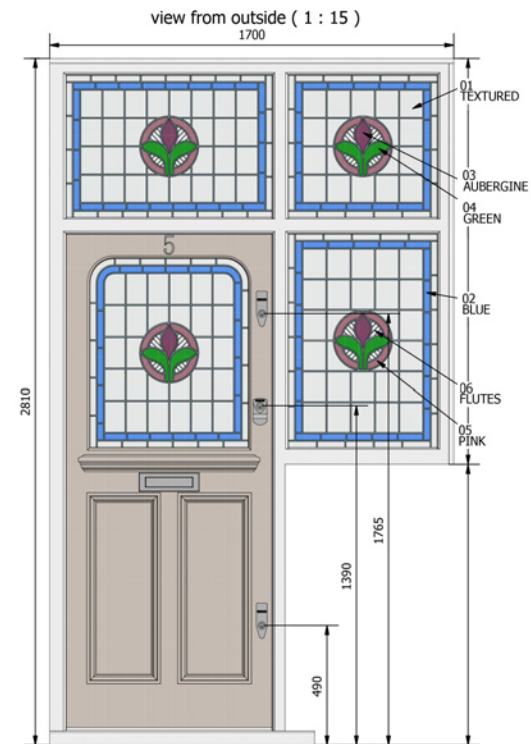

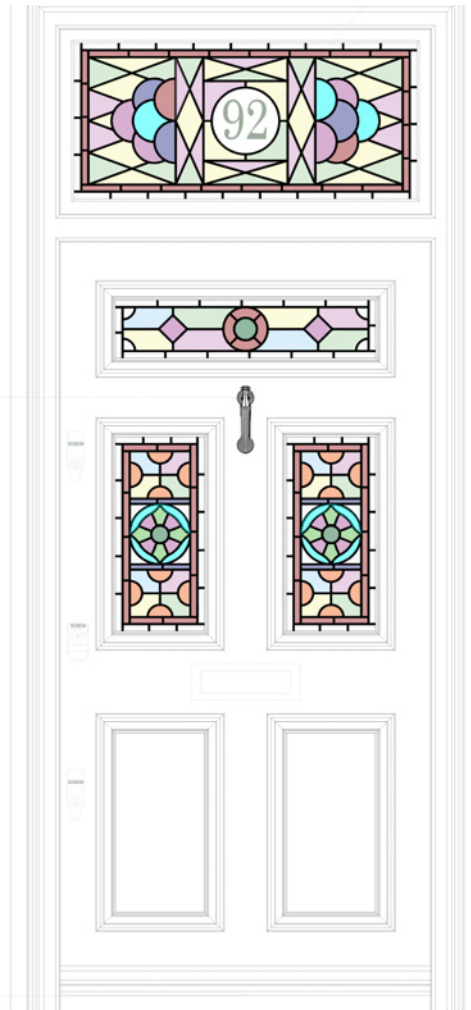

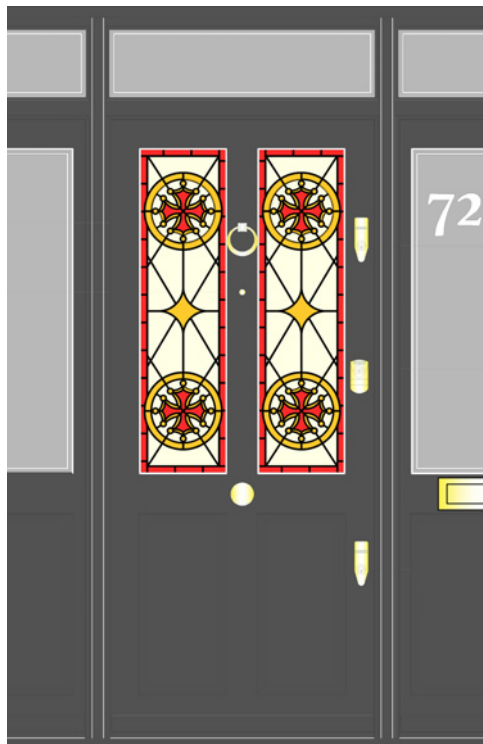

“ I shopped around quite a bit and arrived at a short list. Ayrton won on service, depth of knowledge and also price. I’m sure the other suppliers are fine but I’m glad I went with Ayrton as the full experience from order, design, installation was very good. The quality of the door is first class and the installers were excellent, friendly and very clean. They took pride in their job. After sales were also very good, they followed up to see if I was happy and are willing to rectify any issues. ”

CJ, Tonbridge

An Ayrton Door is one-of-a-kind

Choosing a door that suits your home and reflects your personality is our speciality. Our design team are the number-one experts when it comes to getting this delicate balance just right – and creating an original door that will make a beautiful, secure entrance to your home.

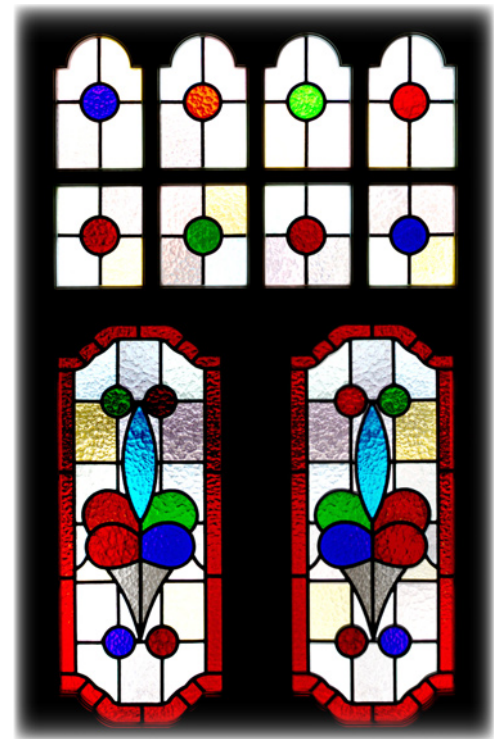

The elements of an Ayrton Door

Knock on wood

We create the best, which is why we only work with the very best. Built into our manufacturer's DNA is the need to work with only the highest quality materials. Our timber is sourced from the cold forests of Latvia, which produces slow growing, stable and strong wood. It's a dream to work with and will make a long-lasting door, guaranteed.

Heart of glass

We buy our glass from the top producers in the world. And whatever style, pattern or design you're looking for – whether it's stained, leaded, etched, textured, security or privacy glass – we can incorporate this into your project. All our glass units are toughened as standard.

Under lock and key

We know that the perfect front door will create a gorgeous entrance to your home. And we also know it needs to be a safe-and-secure barrier against the outside world. That's why we'll replace the entire frame with a new, more substantial 65mm frame and door leaf. This means on average you'll have more than 50% extra timber than your previous door - and that makes it something to be reckoned with. We also put modern seals around the whole frame with a steel weather bar to keep out rain, draughts - and whatever else the great British weather chooses to throw at you.

For extra protection, we only work with Banham locks. Not only are they the most secure locks on the market, but they're also the most reliable. To make the door even stronger and sturdier, we use four adjustable Nico hinges for extra protection. And for the finishing touch? Increasingly we're adding smart home security systems to our door furniture, for the ultimate peace of mind.

"I prefer living in colour"

David Hockney

Looking for a shade with timeless charm, or maybe something a little more playful? You can really make a statement – and stand out from your neighbours – with your new door's colour. Whatever you want, we can make it happen. Our front doors are not limited by colour and we're able to create an exact match with any luxury paint brand or an existing shade in your home.

Split between two choices? Get the best of both worlds. We offer a dual paint option so you can enjoy different colours, internally and externally. And when it's time to paint your new door, we use three layers of paint to ensure it stays rich and glossy for longer.

Choosing the right door furniture

The right accessories can transform basic outfits and elevate your look. And it's no different when it comes to dressing your door. Our design team are the experts when it comes to working out what door furniture options will work best for you, and we have a superb selection for you to choose from.

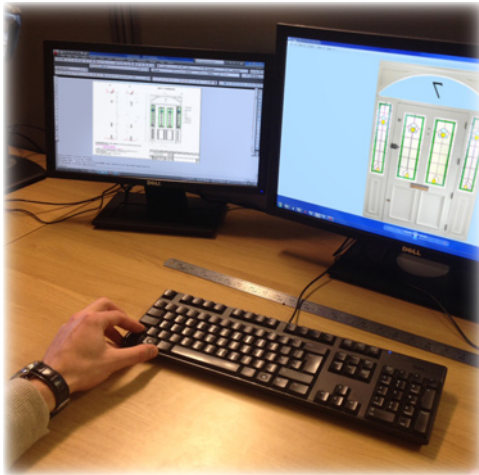

Door knockers, knobs, letterboxes, numbers and spyholes are all available in a range of different finishes. And this is your chance to get really creative. Does a subtle hue call for a striking salmon door knocker? Or maybe a polished brass bee will complement your bright and bold colour choice? We're here to ensure your door makes a dramatic impact.

Getting the perfect fit

We know that the skill and care of installing your door must meet the high levels of its craftsmanship and design. That's why all our fitters are Ayrton employees. Our head installers have worked with us for many years - they are skilled, attentive, experienced working in period homes, and know how to make sure the fit is perfect with minimum fuss.

It will take two working days to complete the installation of your new door. Safety is paramount to us, which is why our installers will make sure no opening is exposed overnight, and that your home is left secure, neat and tidy. So all you have to do is stand back, relax and admire that beautiful new door.

Expert aftercare

As timber is a natural product, and our doors are made up of many different elements and moving parts, we expect snagging issues to crop up occasionally after your door is installed. But don't worry, because the Ayrton aftercare team is on hand to remedy these - however small they might be. Your warranties underpin this and give our customers reassurance for many years to come.

Don't just take our word for it

“Ayrton replaced our massive double front doors and we are delighted. The team made the design process as easy as possible and were professional and helpful throughout. The secure locks and draught-proofing are a plus. The final effect is a classy door, making the house look grand again.”

DS

“We have a splendid new front door from Ayrton, modelled on our original one which was 100 years old. But the new door is not just a reproduction – it has today's standards of insulation and finish, and excellent security locks. Ayrton's prices are high and so is the standard.”

MH, Muswell Hill

“Recently had a new front door installed by Ayrton. A model of professionalism from the initial consultation until the final fitting which was remarkably quick and unobtrusive. The door looks stunning and has made a significant difference to draught and noise issues.”

AL, Balham

“I couldn't be happier and nothing was too much trouble. I took time discussing designs and they were incredibly patient and helpful. The fitters were exceptional and the end result is fantastic, real quality. We put off replacing our windows and door but now I wish I hadn't waited so long.”

LB, Wandsworth

“The team arrived promptly at 8:00am and worked efficiently and cleanly to get the job done with minimum disruption. Their polite and cheerful approach to their work, along with their professionalism, is a credit to Ayrton. The door looks very good and I am pleased with my decision. I believe I have a quality product that will last the test of time and the workmanship has been excellent.”

GC, Ealing

Ayrton has more 5 star reviews than any other timber window and door company.
